Summary

Honoured by Success Awards 2019 as “**தன்னம்பிக்கை சிகரம்**”, Jan 2019

“Universal Achiever Books Record Holder”

As a budding software executive, I have surfed and am surfing through rough tides to attain a position of laureate in the technological field. To me, growing is to find the inside-out ways of a field and to present them even to the remote minds, even though technology has almost crossed its horizon limits in terms of implementation. I have taken this as my motto of success. I'm a budding entrepreneur with six-plus years of experience in programming and development. I have added some important credentials which I have come across are listed below.

Technical Expertise

CEO at Aimer Electronics Solutions

Responsible for the success or failure of the company. Operations, marketing, strategy, financing, creation of company culture, human resources, hiring, firing, compliance with safety regulations, sales, PR, etc.

IT Head at Paramount Auto Bay Solutions

Helped in building up an accurate picture using the resources that are available. It is important to take personal opinion out of as many decisions as possible – I probably don't think in the same way as a typical customer. Information can be gathered from questionnaires, focus groups, the internet, interviews, buying habits and many more sources, but it's important that the information is examined in a scientific way using proper statistical methods. Gut feel can only take your business so far.

Project Manager at Go you Like Pvt. Ltd

Created and Developed websites and its associated applications. I have given technical training to my assistants to work in a variety of industries and often as independent contractors.

Projects Handled

Co - Location Mining in Spatial Data

Description

A co-location pattern is a group of spatial features/events that are frequently co-located in the same region. For example, human cases of West Nile Virus often occur in regions with poor mosquito control and the presence of birds. For co-location pattern mining, previous studies often emphasize the equal participation of every spatial feature. As a result, interesting patterns involving events with substantially different frequency cannot be captured. In this paper, we address the problem of mining co-location patterns with rare spatial features. Specifically, we first propose a new measure called the maximal participation ratio (*maxPR*) and show that a co-location pattern with a relatively high maxPR value corresponds to a co-location pattern containing rare spatial events. As demonstrated by our experiments, our approach is effective in identifying co-location patterns with rare events, and is efficient and scalable for large-scale data sets.

Agri Assist

Description

Agri Assist is one of our Indian project and it's given to Farmers around India. It is used to predict the crop and water level without spending money. Data, Information Management and Financial solution.

My Car Online

Description

My Car Online program is one of our challenging and complicated project constructed in Php We have done the project with the technology specified by the customer This project focusses towards grouping the entire community under a single roof. This project incorporate many more functionalities like intergrating the existing databases with our app,social plugin and functional integrations related to Social Networking.

The Cars

Description

The Cars is one of our Indian project and it's given to one of the car re-seller company It's a very common platform to maintain Customer relationship Management, Human resource Mangement,Data and Information management, Financial solution. A comprehensive platform focussing each and every layers of business for the company. This project is primary done in Dotnet 4.0, VS2010 with SQL Server 2008 R2 as back end.

Technical Certifications

Big Data Analyst

Big Data University - October 2014

Microsoft Certified Dot Net Programmer

Microsoft - March 2014

Honors and Awards

Certified Big Data Analyst

Big Data University

October 2014

World Record Holder – First Person in the world

Universal Achievers Book of Records

Creating 153 Web Application in 10 Hrs. by an Individual

October 2018
